ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: Amended Annual Report for Louisiana State University (LSU) System

We wish to report two errors in our most recent annual report. These only concern LSU site #1 (LSU and (b)(2)High, (b)(7)(F)

Error #1: There was an addition error indicating the total number of dogs used. The correct number in Column F should be 489 (not 350).

Error #2: Pigs (Column C): The correct number should be 8 (not 5); for a total in Column F of 14 (not 11).

We regret these errors.

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 72-R-003

2. Number 3 Horses; 85 Gerbils of animals used in this study.

3. Species (common name) Horse; Gerbil of animals used in the study.

4. Explain the procedure producing pain and/or distress.

Protocol #06-064: Temporary lameness will be induced in horses by advancing two bolts against the side of the horses' hooves.

Protocol #06-053: Injection of parasite (Brugia pahangi) and antigen may cause inflammatory response at site of injection.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Protocol #06-064: Since this study aims to evaluate the efficacy of pain relief by oral methadone in horses, an experimental model of pain to mimic a real pain situation is essential to this objective.

Protocol #06-053: As the goal of this project is to study this inflammatory response, no anti-inflammatory drugs can be administered.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102): N/A

Agency None CFR
